COVID-19
ANTIGEN SELF TEST

CoviFind Covid-19 Antigen Self Test enables early detection of the SARS CoV-2 virus. It helps verify infection quickly, begin proper treatment and initiate isolation precautions helping prevent further spread of infection.
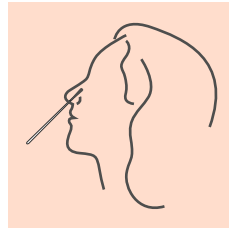

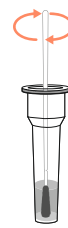

Assay Procedure

Peel the Aluminium foil from the pre-filled buffer tube.
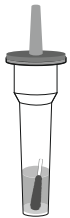

Remove the sterile swab from the tail end.

Carefully insert the swab into one nostril 2-4 cm or until resistance is met.

Insert the swab in the buffer tube and swirl it 8-10 times in the fluid.

Leave the swab inside the tube and discard the stick.

Secure the cap on top of the buffer tube.

Squeeze 4 drops of fluid from the tube into the sample well of the test device.
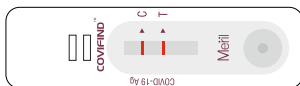

Wait for 15 Mins

Result Interpretation
