# INACTIVAED TRANSPORT MEDIUM (ITM)

## Product Features

### Accurate

- Emphasizes the inactivation of pathogens, ensuring safety during transport.
- Highlights the ease of use and simplified workflow for healthcare professionals.
- Ensures safety of handling personnel involved.

### User Friendly

- Minimal handling steps for sample collection and inactivation, reducing processing time and complexity.
- We provide pre-filled ITM tubes 15 ml self-standing tube with 2ml ITM.
- Close Compact vials preventing leakage.

### Reliable Result

- Ensures the integrity of viral or bacterial RNA/DNA in the sample.
- consistently inactivates a broad range of pathogens, reducing the risk of false negatives.
- Doesn't require cold chain logistics.

## Specifications

- Safe and easy to use. Ensures safety of the person handling the sample collection - the viral specimens is inactivated by the medium ruling out the chance of infection from accidental spillage
- Does not require any special storage conditions unlike VTM, can be stored at ambient temperature
- Viral specimens can be collected, stored and transported at room temperature.
- No variation in performance from VTM. In addition, it makes sample storage simple easy and cost effective (cancels out the requirement of temperature-controlled storage system)

### Pack Size

100 Tests with Throat & Nasal swabs
