

10 x Alpine HBsAG Rapid Card

The Alpine HBsAG Rapid Card is a highly reliable diagnostic tool designed for the accurate detection of Hepatitis B surface antigen (HBsAG).

Key Features:

- **Exceptional Sensitivity and Specificity:** The Alpine HBsAG Rapid Card boasts an outstanding sensitivity and specificity of 100%. This means it can detect the presence of HBsAG with utmost accuracy, reducing the chances of false results and ensuring reliable diagnostic outcomes.
- **Versatile Sample Compatibility:** This rapid card is compatible with various sample types, including serum, plasma, and whole blood. This versatility allows for flexibility in sample collection methods, making it suitable for different clinical scenarios and healthcare settings.
- **Extended Shelf Life:** With a generous shelf life of 24 months, the Alpine HBsAG Rapid Card offers healthcare facilities the convenience of long-term storage. This reduces concerns about product expiration and helps streamline inventory management, ultimately contributing to cost-effectiveness.
- **Rapid Results:** Healthcare professionals can obtain test results within a mere 20 minutes using this rapid card. Such a rapid turnaround time is crucial for timely diagnosis, enabling prompt medical intervention and counseling for individuals with HBV infection.
- **Convenient Storage:** The rapid card can be stored within a temperature range of 2°C to 30°C, ensuring its stability and effectiveness under various environmental conditions. This adaptability makes it suitable for healthcare facilities in diverse settings.
- **Streamlined Testing Process:** Designed with user-friendliness in mind, the Alpine HBsAG Rapid Card simplifies the testing process for healthcare providers. This reduces the likelihood of errors and saves valuable time during patient care, enhancing overall efficiency.
- **Comprehensive HBV Detection:** This rapid card exclusively detects the presence of HBsAG, a vital marker for Hepatitis B infection. Its high sensitivity and specificity make it an essential tool in identifying and managing Hepatitis B cases promptly.

Specifications:

Country of Origin: India

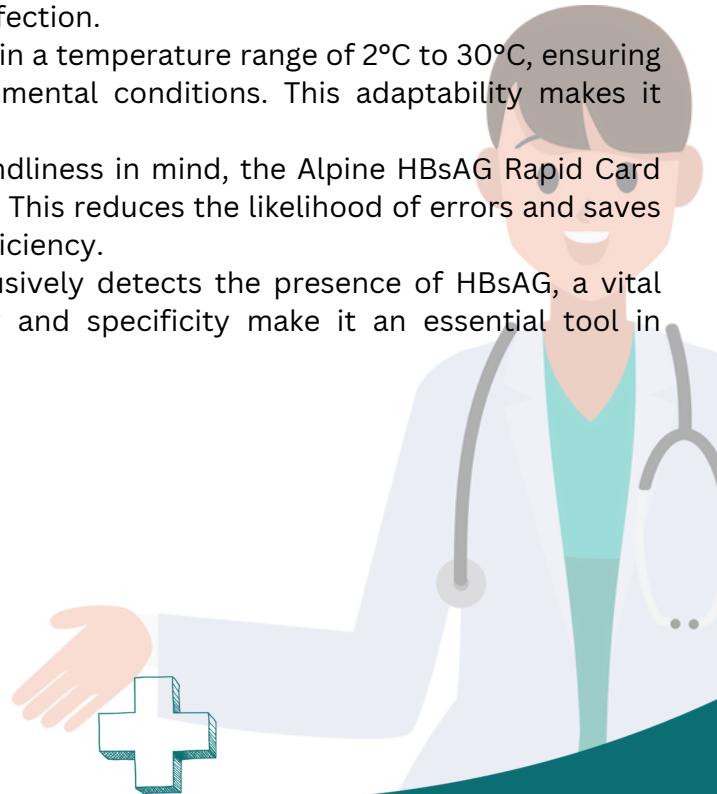

Target: Hepatitis B Surface Antigen

Sample Type: Serum or Plasma

Specificity: 100%

Cross-reaction: None with common diseases

Shelf Life: 24 months
